Blockers and next actions

Blocker	Amount	Invoices
Approval Pending	\$15,847	5
Invoice Error	\$14,652	4
Pricing	\$13,459	2
Purchase Order	\$9,540	2

Recommended 30-day recovery workflow

- 1. Validate the priority list.** Finance excludes relationship-sensitive, legal, or already-resolved items.
- 2. Resolve blockers first.** PO, document, approval, or invoice issues are routed internally before another reminder is sent.
- 3. Work high-priority accounts.** Follow-up is targeted by amount, age, commitment history, and contact recency.
- 4. Track commitments.** Promises are recorded separately and checked against actual payments.
- 5. Review weekly.** Management receives a working-capital brief showing collections, promises, blockers, and next actions.

Interpretation notes

- All calculations are deterministic and should reconcile to the imported ledger.
- Multiple currencies are not FX-normalized in v0.1.
- AI narrative should be generated only after this structured audit is reviewed.

Important: CollectIQ provides operational finance intelligence and collection support. This report is not legal advice, a credit rating, or a guarantee of collection. Human review is recommended before contacting customers.
